About Me

Back in my senior high school years, I learned HTML, CSS, and Bootstrap, and that got me a bit interested in web and system development. My first Hello World program was in the Java programming language.

Now in college, I've picked up new programming languages like C++, Java, and Python, but I'm more into JavaScript and PHP as my main languages.

I also have a disability called clubfoot in my right foot, but I can do everything normally, and it's not an obstacle to reaching my goals in life.

When I'm not coding, I usually watch movies, K-dramas, or anime, listen to music, and enjoy exploring new technologies and working on side my projects.

Skills

- HTML, CSS, Tailwind CSS, JavaScript, TypeScript
- PHP, Laravel
- Node.js, Next.js, React.js
- Git, GitHub, VsCode
- Dart, Flutter
- MySQL, PostgreSQL, NoSQL

Languages

English
Filipino
